FULL-STACK SOFTWARE ENGINEER

C# / .NET Core | Angular | REST APIs | Microservices & Clean Architecture | Cloud (Azure / AWS) | CI/CD | Docker

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, building and deploying scalable web applications and RESTful APIs using C#, ASP.NET Core and Angular. Experienced across the full software development lifecycle — from architecture and development through to containerised deployment, CI/CD pipelines and production support in cloud environments. Skilled in service-oriented and Clean Architecture design, SQL Server performance optimisation, secure API authentication and DevOps collaboration. Strong interest in cloud-native engineering, containerisation and microservices.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, Node.js, Express

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, RxJS

Cloud: Microsoft Azure (App Services, Azure SQL, Storage Accounts), cloud deployment & hosting; AWS (foundational)

DevOps & Containers: Docker, CI/CD pipelines, Git, GitHub, branching strategies, code reviews, release automation

Architecture & Security: REST APIs, microservices / service-oriented architecture, Clean Architecture, OOP, MVC, JWT authentication, role-based access control

Databases: SQL Server, Azure SQL, MySQL, MongoDB, SQL query optimisation & data modelling

PROFESSIONAL EXPERIENCE

THUTONET (PTY) LTD — Aug 2024 – Feb 2026

Full-Stack Software Engineer

- Designed and delivered a scalable e-learning platform built on ASP.NET Core Web APIs and Angular, following Clean Architecture and service-oriented design principles.
- Built and maintained RESTful backend services for student management, enrolment, assessments, scheduling and reporting, consumed by Angular single-page clients.
- Containerised application services with Docker to standardise development, testing and deployment environments.
- Implemented and maintained CI/CD pipelines, automating build and release to Azure App Services, Azure SQL and Storage Accounts.
- Implemented JWT authentication and role-based access control across student, teacher and administrator roles.
- Developed responsive Angular interfaces including dashboards, analytics, enrolment workflows and teacher management modules.
- Optimised data access using Entity Framework Core and LINQ, improving application performance and scalability.

JAG METHOD — May 2023 – Jun 2024

Full-Stack Software Engineer

- Developed and enhanced enterprise applications using C#, .NET, SQL Server, JavaScript, HTML and CSS.
- Designed and implemented RESTful APIs to support business processes and system integrations.
- Improved database performance through SQL query optimisation and efficient data access strategies.
- Delivered new application features that streamlined internal workflows and improved operational efficiency.
- Introduced Git branching and code review practices, improving collaboration and code quality.
- Provided troubleshooting, production support and application performance improvements.

SUMANGO — Nov 2022 – Mar 2023

Software Developer

- Developed a full-stack Indoor Mapping System using Angular, Node.js, Express and MongoDB.
- Designed and implemented REST APIs for real-time mapping and user interaction functionality.
- Built responsive Angular components using TypeScript and integrated them with backend services.
- Designed scalable MongoDB data models and optimised database structures for application performance.
- Applied object-oriented programming principles and modular design; collaborated through Git-based workflows.

PBSA **Nov 2021 – Jun 2022**

Software Developer

- Contributed to the development of a Hospital Management System prototype using ASP.NET Core and SQL Server.
- Built backend APIs supporting patient records, appointments and healthcare workflow management.
- Developed database schemas, validation processes and optimised SQL queries.
- Implemented authentication, authorisation and secure data handling mechanisms.
- Assisted with deployment and maintenance activities in Microsoft Azure environments.

EDUCATION & CERTIFICATIONS

- WeThinkCode — GenAI Programme, 2026
- Simplilearn — Software Developer, 2021 – 2022
- Dynamic ICT — Information Systems, 2019 – 2020

ADDITIONAL INFORMATION

- Full software development lifecycle experience within Agile delivery teams.
- Strong interest in cloud-native architecture, containerisation and microservices.
- Currently developing hands-on cloud and containerisation skills (Docker, AWS, Kubernetes, Terraform).
- Continuous learner with a passion for solving business problems through software.
